

PRAVIN PALUKURU

Mobile Application Developer

+91 7756905012 | kumarpalukuru40@gmail.com | Pune, India | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Mobile Developer experienced in building user-friendly mobile applications using Flutter and Android. Comfortable working with APIs, cloud-backed features, and clean UI design. Known for collaborating effectively with teams and delivering reliable, high-quality apps within tight timelines.

SKILLS

Mobile Development: Flutter, Dart, Kotlin, Android SDK

Architecture: Clean Architecture, MVVM, State Management (Riverpod, Provider)

Backend & Data: REST APIs, Dio, Volley, Firebase Ecosystem, Hive, SQL

Tools & Testing: Git, GitHub, Android Studio, VS Code, Postman, Unit Testing, Mockito

PROFESSIONAL EXPERIENCE

Accenture

Feb 2024 – Present

App Development Associate (Flutter Developer) - Pune, India

- Developed Flutter-based applications with reusable widgets, adaptive layouts, and optimized rendering.
- Implemented state management via Riverpod & Provider and integrated secure REST APIs using Dio, with token authentication and structured JSON handling for async workflows and multi-screen logic.
- Developed a comprehensive file management pipeline using Azure Blob Storage with SAS tokens to securely upload, retrieve, and manage images, PDFs, and other files, including Android-specific PDF preview and download support built via Method Channels.
- Optimized a Java-based PPT-to-Word utility, refining LLM logic for clearer, more accurate summaries.
- Regularly participated in internal code reviews, discussions, and team knowledge-sharing sessions.

Vilasoft Services LLP

Feb 2023 – Jun 2023

Android Development Intern - Remote

- Developed an Android application in Kotlin for temple operations in collaboration with stakeholders to align features with operational needs.
- Built Bluetooth thermal printing workflows for tickets and receipts using ESC/POS standards, ensuring reliable and consistent output across multiple printer models.
- Designed and implemented the app's architecture, navigation stack, and reusable UI components using Activities, Fragments, and ViewModel to ensure scalability and maintainability.
- Integrated REST APIs using Volley to support stable data exchange and backend communication.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: GitHub Copilot Certification (GH-300)

EDUCATION

JSPM's BSIOTR, Pune

2018-2022

B.E. Information Technology - 8.52 CGPA

PROJECTS

Snibbl – Poetry & Micro-Story Social Platform | [Github](#)

- Built a Flutter-based social media app for posting and discovering poetry, featuring guest login, user interactions (likes, saves, comments), and real-time content updates using Firestore.
- Implemented Firebase Auth (Email/Password, Google, Guest) and FCM push notifications for engagement events, with app state managed using Riverpod.

QuickBill – Invoicing & Inventory Management App | [Github](#)

- Developed a business-focused Flutter app for invoice generation, inventory tracking, and sales monitoring tailored for small retailers.
- Implemented real-time data handling using Firestore, scalable state management with Riverpod, and UI features such as dashboards and theme switching.

ACHIEVEMENTS

Recognized at a client hackathon for delivering a demo-ready mobile application.
